

Practice Programs (Pointers)

1. WAP to add two numbers using functions. Pass the pointers to the variables as reference to the functions.
2. WAP to swap two numbers using a function. Pass the values to be swapped to this function using call-by-value method.
3. WAP to swap two numbers using a function. Pass the values to be swapped to this function using call-by-reference method.
4. WAP to accept a set of 10 numbers and print the numbers using pointers.
5. WAP to accept a set of 10 numbers and print the average of these numbers using pointers.
6. WAP to calculate the Factorial of a number using call by reference.
7. WAP to find the length of an array using pointers.
8. WAP to reverse an array using pointers.
9. WAP to search an element in array using pointers.
10. WAP Write a C program to sort array using pointers.
